## General marking principles for Advanced Higher Music

*Always apply these general principles. Use them in conjunction with the detailed marking instructions, which identify the key features required in candidates' responses.*

- (a) Always use positive marking. This means candidates accumulate marks for the demonstration of relevant skills, knowledge and understanding; marks are not deducted for errors or omissions.
- (b) Use your professional judgement when candidates' responses do not exactly match marking instructions but carry the same meaning, for example plagal cadence and IV-I or plainchant and plainsong.
- (c) Candidates are asked to tick one or more boxes in multiple choice questions. Accept a cross or any other sign which makes the candidate's intentions clear.
- (d) Accept inaccurate spelling where the candidate's intention is clear.

## Marking instructions for each question

			<p style="text-align: center;"><b>Additional guidance for Q6(b)(ii)</b></p> <p><b>Excerpt 1 is from the Classical period, the main characteristics of which are:</b></p> <p>The orchestra consists of predominantly strings with woodwind, trumpets and horns (18th century classical orchestra).</p> <p>The harmony used, mainly tonic and dominant, is typical of the classical period. Dominant 7ths or diminished chords are outlined in the melodies and chromaticism is also used.</p> <p>The light, homophonic texture is typical of this period. The texture is melody-dominated and uses arpeggios or broken chords. Antiphonal exchanges are heard between strings and woodwind and the full orchestra.</p> <p>Ornamentation is typical of the period with appoggiaturas, turns and acciaccaturas featuring.</p> <p>Dynamic variation is limited but occasional sforzando and accents are used in the context of the overall dynamic. This is typical of this period.</p> <p><b>Excerpt 2 is from the Romantic period, the main characteristics of which are:</b></p> <p>The increased size of the orchestra in the Romantic period, both in terms of the numbers of string players giving a fuller, richer sound and the addition of other instruments, particularly the expanded brass section who take on a more prominent role in the music, give this a 'larger' orchestral sound.</p> <p>The harmony used shows a development from the classical ideals of I, IV, V, VI and related major and minor keys. The harmony used is complex and rich due to its use of chromaticism, as can be heard particularly at the start of the excerpt, and its use of diminished 7ths at the end.</p> <p>The rich, full texture that is heard in the triplets/3 against 2 section is typical of the large symphonic sound of the Romantic period.</p> <p>Similarly, the wide dynamic range heard throughout the excerpt is also very typical of Romantic music and enhances the emotional expression that is being conveyed through the music.</p>
