Total marks — 80

Attempt ALL questions.

All dimensions are in mm.

All technical sketches and drawings use third angle projection.

You may use rulers, compasses or trammels for measuring.

In all questions you may use sketches and annotations to support your answer if you wish.

Write your answers clearly in the spaces provided in this booklet. Additional space for answers is provided at the end of this booklet. If you use this space you must clearly identify the question number you are attempting.

Use blue or black ink.

Before leaving the examination room you must give this booklet to the Invigilator; if you do not, you may lose all the marks for this paper.

\* X 8 3 5 7 7 0 1 0 1 \*

Total marks — 80

Attempt ALL questions

1. A designer, who specialises in creating 3D computer modelling characters for the games industry, uses an online stock sharing library.

- (a) Describe two advantages and two disadvantages to a game designer of using an online stock sharing library.

4

\* X 8 3 5 7 7 0 1 0 2 \*

## 1. (continued)

- (b) Explain why, when creating 3D characters for games, a designer may use the following techniques.

- Bump mapping
- Polygons
- Morphing (freeform modelling)

## 1. (continued)

The characters will be placed in an outdoor scene. The scene must focus on the characters and must communicate as much realism to the intended audience as possible.

- (c) Describe how each of the following techniques could be used to enhance the scene. 3

- Directional lighting
- Volumetrics
- Depth of field

## 2. (continued)

The company deliver their products to local businesses. The company worked with a graphic design team to produce a range of printed and digital media, shown below.

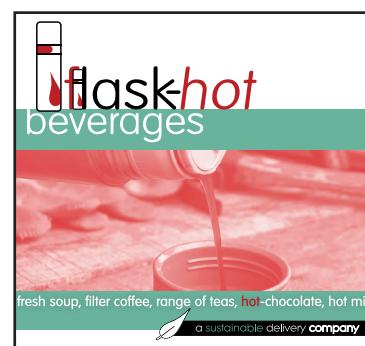

logo and slogan  
from the website

biodegradable  
delivery bag

social media account

printed advertising  
campaign poster

- (b) Describe, making reference to at least two graphics shown above, the challenges of creating brand consistency across a range of media.

You should refer to colour space and dots per inch (dpi) in your answer.

---

---

\* X 8 3 5 7 7 0 1 0 8 \*

## 2. (continued)

The graphic design team created the logo as an AI file but saved the logo in various other file formats.

Company colours				
	C18	M100	Y100	K9
	C60	M11	Y46	K0
	C92	M80	Y62	K98

- (c) (i) Explain, giving two reasons, why the graphic artist created the logo as an AI file.

2

---

---

---

---

- (ii) Explain, giving two reasons, why the AI file was converted into a PNG file for use online.

2

---

---

---

---

The graphic artist was also asked to make the logo available as a DXF file.

- (d) State a use for the DXF logo file.

2. (continued)

A graphic design team has been asked to produce a pull up display for a promotional event.

The team are preparing to send the DTP file to the printing company producing the pull up display. The display will feature the following graphics.

logo

van graphic

photograph

flask graphic

\* X 8 3 5 7 7 0 1 1 0 \*

## 2. (continued)

- (e) Explain why specifying the following information is important when sending the DTP file to a printing company.

- Converting text to vector
- Image resolution
- Pantone colours

You should make reference to a minimum of three of the graphics in your response.

3

**2. (continued)**

A section of the specification for the pull up display is shown below.

**Specification**

Size      2200 × 880 visible area  
Material    White biodegradable vinyl  
Finish     Non-reflective, quick wash finish  
            Main headline to be embossed  
            Fold over double stitched perimeter

edge detail

- (f) Explain, with reference to the specification, why wide format printing is the most suitable method for printing the pull up display.

3

---

---

---

---

---

---

---

Biodegradable vinyl is a new material for the print company. A test print of the pull up display was produced on the new substrate using the specified inks and finish.

- (g) Describe two quality checks that could be made on the test print to ensure the display is ready for commercial printing.

**3. (continued)**

The assembled model was produced using a combination of bottom up and top down modelling.

Refer to supplementary sheet 3 for use with question 3 (c).

- (c) Describe three ways where top down modelling would assist the CAD technician in creating the parts of the grinder.

You should refer to specific parts and their features in your response.

Dimensions are not required.

You may use sketches to support your answer.

**3**

\* X 8 3 5 7 7 0 1 1 8 \*

## 3. (continued)

Refer to supplementary sheets 2 and 3 for use with question 3 (d).

A tolerance has been applied to the groove on the CAP of the grinder.

- (d) Explain two reasons why a specific functional tolerance has been applied to the groove.

## 4. (continued)

Riber have organised a product launch event. The lanyards for the event contain a pass and a scannable barcode. They are printed double-sided on 120 gsm paper. The completed lanyard is shown below alongside some information sent to the print technician.

- (b) Explain why the following information is important for the successful printing and function of the pass.

- Duplexing
- Paper opacity
- Bleed
- Registration marks

You should refer to specific features on the lanyard in your response.
