General marking principles for Advanced Higher Spanish Reading and Translation

This information is provided to help you understand the general principles you must apply when marking candidate responses to questions in this paper. These principles must be read in conjunction with the detailed marking instructions, which identify the key features required in candidate responses.

- (a) Marks for each candidate response must always be assigned in line with these general marking principles and the detailed marking instructions for this assessment.
- **(b)** Marking should always be positive. This means that, for each candidate response, marks are accumulated for the demonstration of relevant skills, knowledge and understanding: they are not deducted from a maximum on the basis of errors or omissions.
- (c) If a specific candidate response does not seem to be covered by either the principles or detailed marking instructions, and you are uncertain how to assess it, you must seek guidance from your team leader.
- (d) Award a mark to each answer. Marks are not transferable between questions.
- (e) The marks available in this paper are as follows:
 - (i) The first set of questions (worth 23 marks) in section 1 requires candidates to provide answers based on comprehension of information from the text. The marks available for each question generally range between 1-4 marks.
 - (ii) The last question in section 1 is the overall purpose question. For this question candidates must draw meaning from their overall understanding of the text. There is a maximum of 7 marks available for full reference to the text and detailed comment. Pegged marks of 5/3/1 are given for degrees of reference to the text and comment. 0 marks will be given where candidates show little or no inferential skills or understanding of the overall purpose of the text.
 - (iii) Section 2 is the translation question (worth 20 marks). For this question candidates must translate the underlined section of the text. The section for translation will be divided into 10 sense units. For each sense unit, 2, 1 or 0 marks will be awarded: 2 marks for a full translation, 1 for partial translation, and 0 for an unsuccessful attempt.
- (f) Credit should be given according to the accuracy and relevance of candidates' answers. Candidates may be awarded marks where the answer is accurate but expressed in their own words'.
